LITE PAPER

OUTLINE

INTRODUCTION

Finix AI is a universe filled with fierce, cute and collectible creatures called Finixs. In Finix AI players have complete ownership of their digital assets and can buy, sell, and trade them just like physical trading cards and collectibles. With new gaming features and experiences, the Finix AI world is always expanding as players will always employ new strategies to stay on top and earn as much rewards as possible. Alternatively Finix AI has made getting rewards easier if you have enough tokens required to get it. With the integration of AI, this P2E project would be something different and interesting for users to use.

GAME CONCEPT

Finix AI has been structured in a way users are rewarded overtime. Holders of the coin would get free NFT drops when the beta version of the game comes out and these NFTs would serve as their first pets to use in the game. The Finix AI team would build the game around what the community requests and make sure above all, its a good experience for everyone because people would not be attracted if the gaming experience isn't fun

BATTLING

A key part of this game is battling and this is where users can get the most rewards in the game. We have spent a lot of time strategizing and coming up with the perfect plan for how beatles should be. We have the 1 v 1, 2 v 2 as well as the 3 v 3 battles and they are done by turns. Users can choose to attack, evade, heal and run away during their turn in a battle. There are also power ups that can help players in battles to increase attack, defence and even both in some cases and there're also critical hits.

AI TECHNOLOGY

Artificial intelligence as we know is a field of science concerned with building computers and machines that can reason, learn, and act in such a way that would normally require human intelligence or that involves data whose scale exceeds what humans can analyze.
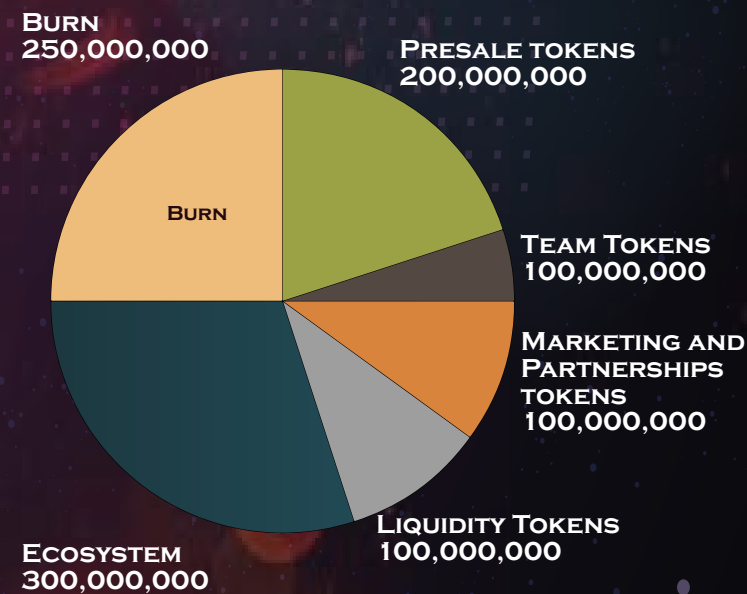

The integration of Artificial intelligence in Finix AI is because we understand that a lot of people play games but not everyone would actively play it for a long time because they have other things to do or they might get occupied so with this feature, from the point you start playing the game the AI studies your playing pattern and overtime it would be able to do tasks for you while you are away so even if you're not actively playing, you are progressing. It's a win-win situation.

TOKEN REVIEW ($FNX)

◆ Bep20 token on binance smart chain

◆ Ability to vote on important project decisions

◆ Trading and Investing

- Buy items on the marketplace

- Earn from staking

- Earn from being a holder

TOKENOMICS

Name	RobotDoge AI
Token Symbol	RDA
Total Supply	1,000,000,000
Presale tokens	200,000,000
Team Tokens	50,000,000 (35,000,000 locked)
Marketing and Partnerships tokens	100,000,000
Liquidity Tokens	100,000,000
Ecosystem	300,000,000 (locked for 3 months)

ROADMAP

Q4 2022
- Ideas and Brainstorming of the project
- Getting the team
- Getting first investor on board
- Finalizing the concept of the project

Q2 2023
- Beta game version
- Gameplay Optimazation
- Weekly contests
- Alpha game version on IOS and Android
- Marketing and Partnerships

Q4 2023
- Occasional bug fixes
- Live gaming events
- personal avatar

Q1 2023
- Creation of project socials
- Getting game devs on board
- Partnerships
- Token and presale launch
- Launch on a DEX (pancakeswap)
- Staking
- Game development

Q3 2023
- Governance DAO
- PC version
- Clan feature
